Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 19-20, drawn to a fluid-flow sensing apparatus, classified in class 73, subclass 434.
 - II. Claims 6-18, drawn to a device for delivering gas to a patient, classified in class 128, subclass 206.24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 6 is an evidence claim showing that the combination device does not require a flow-responsive element projecting into a fluid flow path. The subcombination has separate utility such as being used as a fluid flow sensing apparatus for other uses.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
